Ignite Your Career Development

Professional Workforce Development sponsored by Southern Adventist University has been specifically designed to prepare your employees to advance and succeed in both their careers and their education. Our professional workforce development certificates in Healthcare and Information Technology are asynchronous and self-directed, making it possible to balance education with other responsibilities.

By identifying areas where your organization needs skill improvement and where workforce upskilling or reskilling opportunities exist, we help you to:

• Attract and retain top talent
• Invest in the development of your current workforce
• Boost employee morale and productivity
• Keep your workforce updated on industry advancements
• Streamline onboarding by promoting from within.

Flexibility
All our coursework is fully online, asynchronous and self-directed. Learners are also able to schedule one-on-one time with Student Success Advisors and career coaches.

Financing Options
Various funding options may be available, including financial aid, student loans, workforce funding, and the Core Education Foundation.

Career Opportunities
Projected occupations growth by 2031 in healthcare and Information Technology fields is 13% and 15% respectively.

About Southern Adventist University

Founded in 1892, Southern Adventist University provides a quality, Christ-centered undergraduate and graduate education to approximately 2,700 students each year. Caring professors, hands-on training, and a wide selection of academic options prepare students for success, as demonstrated by our graduates' impressive job placement numbers and high median starting salaries. Located in the foothills of the Smoky Mountains, Southern's 1,300-acre campus features nearly 40 miles of hiking and biking trails, a top-notch fitness center, and much more.
